

Colour Concept

Warm and Cool Colours

The colour wheel can be divided into warm and cool colours.

Warm colours are bright and bold like red, yellow and orange colours.

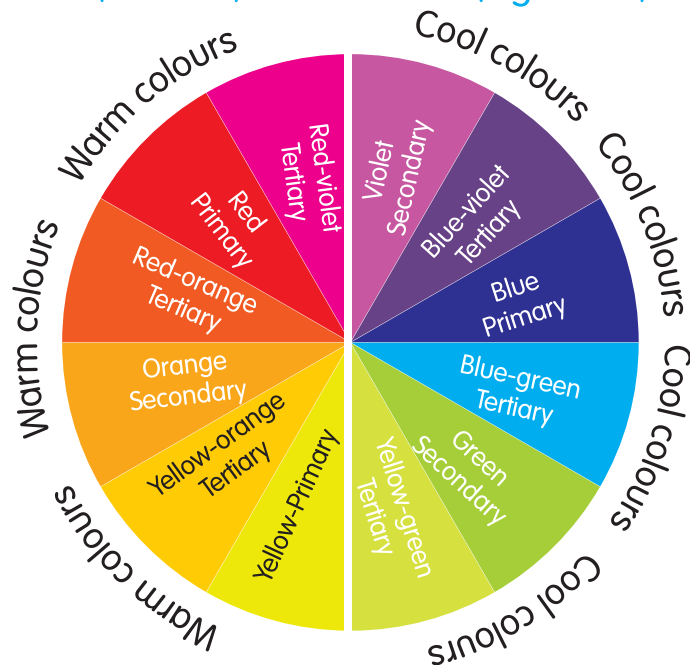

Cool colours give a calm and cool effect like green, blue and violet colours.

Warm Colours

Cool Colours

(Right side)

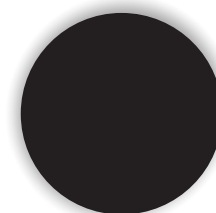

Natural Colours

Black and white are natural colours. Dark and light shades are achieved by adding these colours. Black is added to achieve darker shades and white is added to create light tints.

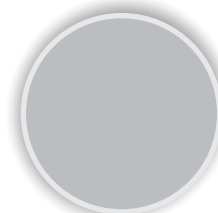

Example : The colour grey is achieved by adding a touch of black in white colour.

WHITE

BLACK

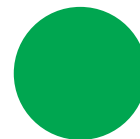

GREY

Complementary Colours

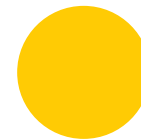

When placed next to each other, they create strongest contrast and reinforce each other. Following are some examples :

RED

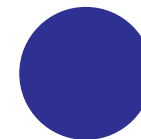

GREEN

YELLOW

VIOLET

BLUE

ORANGE
